The original German wording governs the legal interpretation of your policy.

Building property insurance

The insurance covers		Fire	Natural forces	Theft	Liquids and gas
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.		Destruction, damage or loss as a result of: B1 Fire, smoke (sudden and accidental influence) and water used to extinguish fire; B2 Lightning and overvoltage; B3 Explosion, detonation and implosion; B4 Crash-landings or emergency landings of aircraft, spacecraft or parts thereof, meteorites and other celestial bodies; B5 Pressure waves emitted by aircraft flying at supersonic speeds; B6 Scorch and smoulder damage.	Destruction, damage or loss as a result of: C1 Flooding and inundation; C2 Storms (wind of 75 km/h or more that uproots trees or takes the roofs off buildings in the vicinity of the insured property); C3 Hail; C4 Avalanches; C5 Snow pressure; C6 Rockslides and rock impacts; C7 Landslides.	Damage conclusively proven by physical traces, witnesses or circumstances to have been caused by: D1 Theft or attempted theft.	Destruction, damage or loss as a result of: E1 Leakage of liquids and gas: a) from pipelines or connected installations or apparatus; b) from decorative fountains, aquaria waterbeds, pools, liquids from humidifiers; c) and the resultant loss of liquids or gas; E2 Water condensation from cooling equipment and devices; E3 Penetration of rain and melting snow into the building through the roof, from roof gutters or from outdoor drain pipes, through closed windows, doors and skylights; E4 Backpressure from sewage ducts as well as underground slope water, ground water, rock water and seepage water inside the building; E5 Pipelines frozen or damaged by frost, tanks and containers serving the insured company and/or the insured buildings as well as adjacent installations, apparatus and machinery. Costs for the thawing of frozen pipelines are covered; E6 Fungal or pest infestation of any kind if proven to have been caused by insured water damage, if reported to Helvetia immediately, and provided that the construction has not been modified or extended in any way in the meantime.
The explanation of terms must be used additionally to determine the insurance coverage.		Underinsurance

The insurance does not cover		Fire	Natural forces	Theft	Liquids and gas
A9 Items and costs that are insured or must be insured separately; A10 Damage to machinery and equipment related directly to tests and experiments conducted on same; A11 Additional costs due to reconstruction restrictions required for the maintenance of operations within a presumed scope during the period of disruption; A12 Pit excavation, water retention, levelling, backfilling and environmental work, and other special construction-related precautionary measures aimed at reinforcing the subsoil; A13 Costs related to contaminated sites; A14 Damage caused by deficient maintenance (e.g. defective joints, missing or inadequate checking and maintenance of water pipes) or failure to implement preventive measures; A15 Damage caused by deficient construction techniques, execution and planning errors, and defective materials; A16 Damage caused by atomic structure changes irrespective of the cause; A17 Damage caused by water from reservoirs or other man-made water installations irrespective of the cause; A18 Damage from tremors caused by the collapse of man-made cavities; A19 Damage caused by war events or warlike events, neutrality violations, revolution, rebellion or riots, unless the policyholder can provide evidence that the damage is not related to these events; A20 Damage caused by terrorist activities and counterterrorism measures, unless the policyholder provides evidence that the damage is not related to these events. This exclusion does not apply if the sum insured for the building does not exceed CHF 10 million per building; A21 Costs for replacing locks, for locks which cannot be opened with the keys in question; A22 Damage to land, air and water.		B7 Damage caused by the purpose-related or gradual effects of heat or smoke; B8 Damage caused to electrical safety mechanisms such as fuses in the performance of their normal function; B9 Overvoltage damage caused by a defect inside a device, a machine or an installation (so-called operating damage); B10 Damage caused by water hammer, centrifugal and other mechanical forces; B11 Damage caused by earthquake or volcanic eruption, and by civil unrest.	C8 Damage caused by subsidence of soil or bad subsoil; C9 Damage caused by artificial earth movements, groundwater, rising and overflow of bodies of water which experience has shown are likely to recur sooner or later; C10 Snow falling from roofs; C11 Damage caused by backwater from the sewage system, irrespective of the cause; C12 Business and operating damage which experience has shown are likely to occur, such as damage during building and road construction, tunnelling, quarrying of stone, gravel, sand or clay; C13 Damage from hail or snow pressure on plants and crops including products; C14 Snow pressure damage and the consequences thereof, provided that the pressure applied by the snow only affects bricks or other roofing materials, chimneys, gutters or drainpipes; C15 Damage caused by earthquake and volcanic eruption.	D2 Damage caused by loss or misplacement; D3 Damage caused by persons who live in the same household as the policyholder or who work for the policyholder; D4 Damage caused by vandalism, i.e. exclusively malicious and intentional damage to the insured items; D5 Damage caused by fire, natural forces, civil unrest, earthquake and volcanic eruption.	E7 Damage that a third party is required to cover by law or contract. This exclusion does not apply to advance payments; E8 Damage caused when filling, emptying or inspecting heating, tank, heat recovery and cooling equipment; E9 Damage caused by rain or melting snow through open windows, doors, skylights or openings in the roof, or related directly with new constructions, modifications or other work; E10 Damage caused by rain and melting snow to the house façade (exterior walls and insulation including windows, doors, etc.) and to the roof (support structure, roof covering and insulation); E11 Costs for locating, exposing, repairing or replacing burst earth tubes, geothermal probes, underground heat storage systems, etc. and for walling up or covering same; E12 Replacing damaged pipelines and replacing, repairing and rectifying connected apparatus, installations, heating equipment, tank equipment, heat recovery equipment and cooling equipment causing damage; E13 Costs for the defrosting and repair of gutters and drainpipes; E14 Damage to cooling equipment caused by artificially generated frost; E15 Direct damage to heat exchangers and/or heat pump circulation systems as a result of the mixture of water with other liquids or gases within these systems; E16 Damage to sections of pipes, tanks and containers through wear and tear, regular use, rust and corrosion; E17 Predictable and purpose-related leakage of liquids and gas; E18 Damage to leaking molten or vaporous discharges and the costs for eliminating the cause of the damage; E19 Damage caused by sustained and excessive heat extraction, potentially causing the probe system to freeze (e.g. as a result of the heat pump being incorrectly set or it being used for construction drying); E20 Damage caused by fire, natural forces, civil unrest, earthquake and volcanic eruption; E21 Costs if the measures are by order of a public authority or for maintenance reasons (renovations taking place).

Period of validity (duration of liability)

- F1

The obligation to pay benefits for loss of rental income, loss of earnings and/or additional costs commences upon the occurrence of the insured event and lasts for a maximum period of 24 months.
- F2

The obligation to pay benefits for standing costs and and/or subsequent increase commences upon the occurrence of the insured event and lasts for a maximum period of 24 months.

Building property insurance

The insurance covers	
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.	
The explanation of terms must be used additionally to determine the insurance coverage.	
A23 Glazing of buildings and building surroundings, as well as sanitary facilities	■ Insured if specified in the policy
A24 Glazing of buildings and building surroundings, as well as sanitary facilities of shared-use premises	■ Insured if specified in the policy

Glass breakage	
G1 Breakage damage and the resultant follow-up costs and damage to: a) buildings and parts thereof; b) building surroundings; c) equipment and materials.	
G2 Damage to glass containers, all types of illuminants and light bulbs;	
G3 Damage caused by scratches or welding spatter e.g. to the surface, the glaze or the paint coat;	
G4 Damage caused during work on the insured property, when moving or installing glazing, including framing;	
G5 Damage to electrical and mechanical equipment, e.g. glass ceramic stoves, company plaques, illuminated signs and automated lavatory installations;	
G6 Damage caused by fire, natural forces, earthquake or volcanic eruption.	

Underinsurance

The insurance does not cover

- A25 Registered vehicles and trailers including accessories;
- A26 Damage caused by deficient construction techniques, execution and planning errors, and defective materials;
- A27 Damage caused by atomic structure changes irrespective of the cause;
- A28 Damage caused by water from reservoirs or other man-made water installations irrespective of the cause;
- A29 Damage from tremors caused by the collapse of man-made cavities;
- A30 Damage caused by war events or warlike events, neutrality violations, revolution, rebellion or riots, unless the policyholder can provide evidence that the damage is not related to these events;
- A31 Damage caused by terrorist activities and counterterrorism measures, unless the policyholder provides evidence that the damage is not related to these events. This exclusion does not apply, if the sum insured for the building does not exceed CHF 10 million per building.

Glass breakage

- G2 Damage to glass containers, all types of illuminants and light bulbs;
- G3 Damage caused by scratches or welding spatter e.g. to the surface, the glaze or the paint coat;
- G4 Damage caused during work on the insured property, when moving or installing glazing, including framing;
- G5 Damage to electrical and mechanical equipment, e.g. glass ceramic stoves, company plaques, illuminated signs and automated lavatory installations;
- G6 Damage caused by fire, natural forces, earthquake or volcanic eruption.

The insurance covers	
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.	
The explanation of terms must be used additionally to determine the insurance coverage.	
A32 Building	■ Sum insured according to policy
A33 Parts of the building not insured by cantonal buildings insurance	■ Sum insured according to policy
A34 Follow-up costs, building surroundings, equipment and materials, as well as construction services	
A34.1 a) Necessary follow-up costs b) Standing costs c) Artistic or historic values d) Subsequent increase e) Building surroundings f) Equipment and materials	Sum insured according to policy
A34.2 Costs for risk-reducing measures	CHF 5'000
A34.3 Costs due to regulatory reconstruction restrictions	CHF 5'000
A34.4 Construction services up to a construction amount of CHF 200'000	CHF 200'000
A35 Loss of rental income, loss of earnings, additional costs	Sum insured according to policy

Underinsurance

Earthquake and volcanic eruption

- Destruction, damage or loss as a result of:
- H1 Earthquake: Tremors triggered by tectonic movements in the earth's crust;
- H2 Volcanic eruption: Ascension and/or discharge of magma (molten rock), including flowing lava, raining ash and gas clouds.
- Damage caused in different places and at different times are deemed to be a single insured event if they occur within 168 hours of the first earthquake or volcanic eruption causing damage and if they are attributable to the same atmospheric or tectonic event.

- Sum insured according to policy
- Sum insured according to policy

The insurance does not cover

- A36 Items and costs that are insured or must be insured separately;
- A37 Additional costs due to reconstruction restrictions required for the maintenance of operations within a presumed scope during the period of disruption;
- A38 Pit excavation, water retention, levelling, backfilling and environmental work, and other special construction-related precautionary measures aimed at reinforcing the subsoil;
- A39 Costs related to contaminated sites;
- A40 Damage caused by deficient construction techniques, execution and planning errors, and defective materials;
- A41 Damage caused by atomic structure changes irrespective of the cause;
- A42 Damage caused by water from reservoirs or other man-made water installations irrespective of the cause;
- A43 Damage caused by war events or warlike events, neutrality violations, revolution, rebellion or riots, unless the policyholder can provide evidence that the damage is not related to these events;
- A44 Damage to land, air and water.

Earthquake and volcanic eruption

- H3 Tremors caused by the collapse of man-made cavities. In cases of doubt, the decision of the Swiss Earthquake Service applies;
- H4 Damage caused by artificially caused earthquakes. This exclusion does not apply to advance payments.

Period of validity (duration of liability)

- I1 The obligation to pay benefits for loss of rental income, loss of earnings and/or additional costs commences upon the occurrence of the insured event and lasts for a maximum period of 24 months.
- I2 The obligation to pay benefits for standing costs and and/or subsequent increase commences upon the occurrence of the insured event and lasts for a maximum period of 24 months.

Building property insurance

The insurance covers		all risks Destruction, damage or loss caused by a sudden and unforeseen event during the term of this contract				
		Collision	Operations	Construction accident	Extended coverage	Unspecified risks
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.		J1 Collision damage: Breakage, cracks or deformation caused by an external force, in particular by: a) Impact, head-on collision, collapse, falling or subsidence; b) Accidental external impact of goods involved in the work process or of parts of the insured object itself.	K1 Operating damage: Breakage, cracks or deformation caused by an internal force; K2 Damage caused by improper usage.	L1 Sudden and unforeseen construction accidents during the construction period; L2 Damage caused by graffiti or vandals to those buildings and parts on which construction is being performed, unless such damage is covered by work planned for later (e.g. plastering, panelling etc.). Damage caused by civil unrest is also insured. Damage that is charged pursuant to SIA standards to the building owner, the architects, engineers and construction manager as well as the companies involved in the construction work and their subcontractors is insured, provided that their services are included in the sum insured.	M1 Civil unrest: Violence against persons and property committed in the course of riots or turmoil. Damage caused by looting during civil unrest is also insured; M2 Malicious damage: Intentional damage or destruction. Malicious damage caused during strikes and lockouts is also insured; M3 Leakage of automated fire extinguisher systems: Liquids and gases that are unexpectedly, suddenly and inappropriately discharged from a recognised fire extinguisher system; M4 Vehicular collision: Collision by motor vehicles, trailers or track-bound transport systems; M5 Building collapse: Collapse of buildings and parts of buildings; M6 Radioactive contamination: Unusability due to unforeseen and sudden contamination by radioactive substances in the operating area; M7 Damage caused by martens, rodents, insects and wild animals.	N1 Unspecified risks.
The explanation of terms must be used additionally to determine the insurance coverage.		Underinsurance

The insurance does not cover	Collision	Operations	Construction accident	Extended coverage	Unspecified risks
A49 Items and costs that are insured or must be insured separately; A50 Damage to machinery and equipment related directly to tests and experiments conducted on the same; A51 Damage caused by subsidence, cracking, shrinkage and expansion of buildings and parts of buildings; A52 Additional costs due to reconstruction restrictions required for the maintenance of operations within a presumed scope during the period of disruption; A53 Damage to goods during the loading and unloading of vehicles as well as in transit; A54 Pit excavation, water retention, levelling, backfilling and environmental work, and other special construction-related precautionary measures aimed at reinforcing the subsoil; A55 Costs related to contaminated sites; A56 Damage caused by deficient maintenance or failure to implement preventive measures; A57 Damage caused by atomic structure changes irrespective of the cause; A58 Damage caused by water from reservoirs or other man-made water installations irrespective of the cause; A59 Damage from tremors caused by the collapse of man-made cavities; A60 Damage caused by war events or warlike events, neutrality violations, revolution, rebellion or riots, unless the policyholder can provide evidence that the damage is not related to these events; A61 Damage caused by terrorist activities and counterterrorism measures, unless the policyholder provides evidence that the damage is not related to these events. This exclusion does not apply, if the sum insured for the building does not exceed CHF 10 million per building; A62 Digital data and software (excluding operating systems/firmware that are an integral part of insured objects); A63 Damage to or loss of operating systems/firmware that is not the direct result of physical damage, destruction or loss of the data carrier on which the operating systems/firmware were stored; A64 Damage to land, air and water.	J2 Property and costs that can be insured pursuant to B–H and K–N under the heading "The insurance covers" or are excluded under the heading "The insurance does not cover"; J3 Damage arising: a) without the influence of external forces (internal operating damage, e.g. lack of water, oil, fuel or another operational resource, frost, excessive strain, short-circuiting, introduction of foreign objects); b) from the necessary influence of appropriate usage of an insured object (e.g. wear & tear). However, should such events result in unexpected and suddenly occurring damage or destruction as a result of externally applied force, such consequential damage is insured.	K3 Property and costs that can be insured pursuant to B–J and L–N under the heading "The insurance covers" or are excluded under the heading "The insurance does not cover". This exclusion does not apply to overvoltage damage caused by a defect inside a device, a machine or an installation (so-called operating damage); a) Damage caused by water hammer, centrifugal and other mechanical forces; b) Costs for locating, exposing, repairing or replacing burst earth tubes, geothermal probes, underground heat storage systems, etc. and for walling up or covering same; K4 Damage for which the manufacturer, seller, the repair company or maintenance company is liable for in accordance with the law or contract; K5 Expenses to rectify faults (faulty workmanship or planning); K6 Properties currently under construction or in the process of conversion or assembly prior to acceptance; K7 Damage caused by sustained and excessive heat extraction, potentially causing the probe system to freeze (e.g. as a result of the heat pump being incorrectly set or it being used for construction drying); K8 Follow-up costs and additional costs for geothermal probes or for earth tubes underground panels no longer accessible.	L3 Property and costs that can be insured pursuant to B–K, M and N under the heading "The insurance covers" or are excluded under the heading "The insurance does not cover"; This exclusion does not apply to construction services where damage is caused by the risks specified under D–F; L4 Damage caused by normal weather conditions that must be expected given the time of year and local conditions, regardless of other contributory factors such as execution or design errors, coordination errors, inadequate protective or safety measures). However, insurance coverage is provided if the damage caused by weather conditions is itself the result of an insured construction accident of if the insured parties can provide evidence that it is attributable to the actions of a party not involved in the construction; L5 Any type of incidental costs not included in the insured construction costs, but which have become necessary before or following a construction accident (e.g. incidental costs for additional reinforcement, supporting elements, additional backfills, emergency roofing, end wall reinforcement, flooding protection measures, sewage redirection etc.); L6 Earthwork: Excluded from this are the following: a) Excavations required for siding renovation; b) Excavation work related to pipes and cables for supply and disposal (water, wastewater, gas, electricity, telecommunications). This list is conclusive; L7 Expenses to rectify faults (faulty workmanship or planning). However, if a fault is the cause of an unforeseen construction accident, Helvetia provides compensation less the costs that would have been incurred to rectify the fault even without a construction accident; L8 Expenses to rectify aesthetic flaws, even if these are the consequence of an event for which there is a liability to pay compensation; L9 Damage that must be covered by the liability insurance provider of a party involved in the construction of the structure, even if said party is also insured by this policy. This exclusion does not apply to advance payments;	M8 Property and costs that can be insured pursuant to B–L and N under the heading "The insurance covers" or are excluded under the heading "The insurance does not cover". This exclusion does not apply to damage caused by vandalism; M9 Properties that are under construction or in the process of conversion or assembly, unless the policyholder can provide evidence that the damage is not related to these activities; M10 Damage caused by deficient construction techniques, execution and planning errors, and defective materials. In the case of malicious damage: M11 Damage caused by the company's own employees or external personnel, provided that the damage does not occur in relation to a strike or lockout; M12 Lost movable property. In the case of leakages of automated fire extinguisher systems: M13 Damage to the fire extinguisher system itself; M14 Damage caused during pressure tests, inspections, testing and maintenance work on the fire extinguisher system; M15 Damage caused during construction and repair work on the fire extinguisher system. In the case of vehicular collision: M16 Damage that is covered by an obligatory liability insurance policy. This exclusion does not apply to advance payments; M17 Damage to vehicles (including their freight) that are involved in the insured event. In the case of radioactive contamination: M18 Damage caused by nuclear reactors, nuclear fuel or other nuclear materials; M19 Damage for which compensation can be claimed under federal nuclear liability legislation; M20 Costs for eliminating the cause of the radioactive contamination. In the case of damage caused by martens, rodents, insects and wild animals: M21 Damage caused by wood pests. This exclusion does not apply to European house borer, woodworm or the deathwatch beetle; M22 Damage caused by root predation, as well as crop failures; M23 Costs for identifying, controlling and eliminating martens, rodents, insects and wildlife.	N2 Property and costs that can be insured pursuant to B–M under the heading "The insurance covers" or are excluded under the heading "The insurance does not cover"; N3 Foundations, roads, paths, tunnels, bridges, dams, docks, harbour basins, quay walls, silos, pipelines, wells, basins, ducts, cables and pipes, unless they exclusively serve that building.

The insurance does not cover	Collision	Operations	Construction accident	Extended coverage	Unspecified risks
			L10 Damage caused by a) simple leaks in or water permeability of concrete or sealants; b) any leaks in ducts or pipelines as well as deviations from the intended route (horizontal or vertical), unless the cause is related to an unforeseen and sudden earth movement; c) Formation of cracks of any kind, even where leak tightness is impaired. However, cracks that make renovation of a part of a building unavoidable for structural reasons are insured; L11 Damage to conduits, pipes and cables where mandatory testing and probing to determine the situation has not been performed, and any resultant consequential damage.		
Period of validity (duration of liability) O1 The obligation to pay benefits for loss of rental income, loss of earnings and/or additional costs commences upon the occurrence of the insured event and lasts for a maximum period of 24 months. O2 The obligation to pay benefits for standing costs and and/or subsequent increase commences upon the occurrence of the insured event and lasts for a maximum period of 24 months.					

Owner’s liability insurance

The insurance covers		Bodily injury	Property damage	Purely financial loss
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.		P1 Third-party liability claims for damages brought against insured persons on the basis of statutory liability provisions due to death, injury or other health impairment; P2 Costs for fending off unjustified claims; P3 Coverage includes financial losses where attributable to insured bodily injury.	Q1 Liability claims for damages from third parties brought against insured persons on the basis of statutory liability provisions due to destruction, damage or loss of property; Q2 Costs for fending off unjustified claims; Q3 Coverage includes financial loss where attributable to insured property damage inflicted upon the injured party. Death, injury and other health impairment as well as the loss of animals are equivalent to property damage. The functional impairment of an object without its substance being impaired shall not be deemed to be property damage.	R1 Third-party liability claims for damages that are brought against insured persons on the basis of statutory liability provisions due to financial loss (losses quantifiable in financial terms) and which can be attributed neither to insured bodily injury claims nor to insured property damage claims inflicted upon one of the injured parties; R2 Costs for fending off unjustified claims.
The explanation of terms must be used additionally to determine the insurance coverage.				
A65 Liability from the basic insurance				
A65.1	a) arising from the state or maintenance of the insured properties; b) arising from exercising property rights related to the insured properties; c) arising from ownership of the machinery and installations belonging to the insured properties.	Sum insured according to policy	Sum insured according to policy	
A65.2	Loss prevention costs for loss prevention costs, i.e. if the occurrence of an insured personal injury or property damage is imminent as a result of an unforeseen event, the insurance cover also extends to the costs borne by an insured person by law which are caused by reasonable, immediate measures to avert this risk (loss prevention costs), but not to measures after the risk has been averted.			Sum insured according to policy
A65.3	Environmental impairment for personal injury and property damage in connection with environmental impairment related to the insured objects if these are the result of a single, sudden, unforeseen event that also requires immediate measures such as reporting to the competent authority, alerting the population, initiating loss prevention or loss minimisation measures. The rusting through or leakage of installations in which substances harmful to the soil or water, such as liquid fuels, acids, bases and other chemicals (but not waste water and other operational waste products) are stored, shall be treated in the same way as a single, sudden event in accordance with the preceding paragraph. Installations in the above sense are tanks and tank-like containers (basins, tubs, etc., but not mobile containers) and pipelines including the associated installations (carbura clause).	Sum insured according to policy	Sum insured according to policy	Coverage includes the loss prevention costs charged to the policyholder (within the scope of the sum insured set for bodily injury and property damage).
A65.4	Builder's liability of the policyholder as builder for damage to third-party land, buildings and other works caused by demolition, earthmoving or construction work, for structures up to a construction sum of CHF 200'000. The construction sum according to the construction budget chapters 1 to 4 including fees and VAT applies. If the damage is covered by another liability insurance, the insurance cover of the present policy shall apply on a subsidiary basis (condition and sum difference cover).	Sum insured according to policy	Sum insured according to policy	
A65.5	Use of motor vehicles, bicycles and trailers for damage as the owner and arising from the use of motor vehicles and bicycles, as well as trailers and towed vehicles towed by them, which serve the maintenance of the insured objects and the associated properties and occur during maintenance work, insofar as no compulsory insurance is prescribed for this under Swiss road traffic legislation.	Sum insured according to policy	Sum insured according to policy	
A65.6	Legal protection in criminal, supervisory and administrative proceedings If disciplinary, supervisory, administrative or criminal proceedings are initiated by the competent authority as a result of an insured building liability event, which may have an impact on Helvetia's benefits, Helvetia shall pay the expenses incurred by the insured person as a result (such as lawyers' fees, expenses, court and expert costs, party compensation to private plaintiffs) as well as the costs imposed on the insured person in the proceedings. If any other insurance covers expenses in accordance with the above paragraph, the insurance cover provided by this policy shall apply on a subsidiary basis (condition and sum difference cover).			Sum insured CHF 250'000

The insurance covers		Bodily injury	Property damage	Purely financial loss
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy.		P1 Third-party liability claims for damages brought against insured persons on the basis of statutory liability provisions due to death, injury or other health impairment; P2 Costs for fending off unjustified claims; P3 Coverage includes financial losses where attributable to insured bodily injury.	Q1 Liability claims for damages from third parties brought against insured persons on the basis of statutory liability provisions due to destruction, damage or loss of property; Q2 Costs for fending off unjustified claims; Q3 Coverage includes financial loss where attributable to insured property damage inflicted upon the injured party. Death, injury and other health impairment as well as the loss of animals are equivalent to property damage. The functional impairment of an object without its substance being impaired shall not be deemed to be property damage.	R1 Third-party liability claims for damages that are brought against insured persons on the basis of statutory liability provisions due to financial loss (losses quantifiable in financial terms) and which can be attributed neither to insured bodily injury claims nor to insured property damage claims inflicted upon one of the injured parties; R2 Costs for fending off unjustified claims.
The explanation of terms must be used additionally to determine the insurance coverage.				
Special provisions for co-ownership, freehold ownership and joint ownership				
A65.7	Liability as owners of insured properties held in co-ownership or joint ownership	Sum insured according to policy	Sum insured according to policy	
A65.8	Liability as individual freehold owners towards the owner community for damage to jointly used parts of buildings and land		Sum insured according to policy	
	If the damage is covered by another liability insurance, the insurance cover of the present policy shall apply on a subsidiary basis (condition and sum difference cover).			
A65.9	Liability as the owner community towards individual freehold owners for damage caused as a result of factors originating in jointly used parts of the building and land	Sum insured according to policy	Sum insured according to policy	
A65.10	Liability as a single freehold owner towards another freehold owner for damage caused as a result of factors originating in the parts of the building vested as separate property entitlements	Sum insured according to policy	Sum insured according to policy	
	If the damage is covered by another liability insurance, the insurance cover of the present policy shall apply on a subsidiary basis (condition and sum difference cover).			

Not insured are claims

- A66** from damage:
- a) by the policyholder;
 - b) pertaining to the policyholder personally (e.g. primary earner);
 - c) by persons living in a joint household with the liable insured person;
- A67** due to a contractually assumed liability exceeding the statutory provisions or due to non-fulfilment of statutory or contractual insurance obligations;
- A68** from losses whose occurrence was to be expected with a high degree of probability by the insured persons or was accepted. The same applies to damage that had to be expected with a high degree of probability with regard to the choice of a certain method of working for the purpose of reducing costs or speeding up work or avoiding loss of assets;
- A69** from damage to land, buildings and other works caused by demolition, earthmoving or construction work, brought against the policyholder in his capacity as builder (reserved A65.4);
- A70** from damage in connection with environmental impairment
- a) if only several events of the same kind (such as occasional dropwise penetration of harmful substances into the soil, repeated spillage of liquids from mobile containers, etc.) trigger measures in the above sense, which are not necessary in the case of individual events of this kind;
 - b) if the damage is actual environmental damage, i.e. damage to property which is not an individual legal asset.i.e. damage to property that is not an individual legal asset;
 - c) if it is a question of contaminated sites;
 - d) by facilities for the storage, processing, transfer or disposal of waste, other waste products or recycling material, provided that the policyholder is the owner of these facilities or they are operated by him or on his behalf. This exclusion does not apply to company-owned facilities
 - for composting or short-term interim storage of waste or other waste products;
 - for the clarification or pre-treatment of waste water;
 - e) which are the result of culpable disregard of statutory or official regulations;
- A71** from damage caused by substances brought in by the insured persons to facilities for the storage, processing, transfer or disposal of waste or other waste products or recycling material. This exclusion does not apply to damage caused to facilities used for the treatment and pre-treatment of sewage;
- A72** from damage resulting from exposure to ionising radiation and laser beams;
- A73** for all damage caused in connection with the intentional commission of a felony or misdemeanour within the meaning of the Swiss Criminal Code as well as claims arising from the consequences of assault;
- A74** in connection with liability as the owner and/or arising from the use of land vehicles, water vehicles, aircraft and bicycles that are registered or used in a manner not permitted by law (such as use without a valid driver's licence) or used for journeys not authorised by the authorities;
- A75** from nuclear damage within the meaning of Swiss nuclear energy liability legislation as well as the associated costs;
- A76** from liability for damage:
- in connection with diethylstilbestrol (DES), 8-hydroxichinoline/SMON, fluoxetine and slimming agents (fenfluramine/phentermine, dexfenfluramine/phentermine);
 - in connection with urea-formaldehyde;
 - which is directly or indirectly attributable to or related to asbestos or materials containing asbestos;
- A77** from damage arising from the handling of
- genetically modified organisms or equivalent products due to the modification of the genetic material;
 - pathogenic organisms due to their pathogenic properties;
- Furthermore, claims from damage arising from the production of or trade in feedstuffs or feed additives or components containing genetically modified organisms are not insured.
- These exclusions do not apply if the damage has no causal connection with genetically modified or pathogenic organisms;
- A78** for damage to joint owners. Persons living with them in the same household are handled in the same way;
- A79** from damage to the community of owners or a co- or condominium owner due to damage to jointly used parts of the building (incl. the associated installations and facilities) and land, which corresponds to the ownership quota of the insured person;
- A80** from
- damage to property which an insured person or a third party commissioned by him has taken over for use, processing, safekeeping or transport or for other reasons (such as on commission, for exhibition purposes) or which he has rented, leased or rented;
 - damage to property which an insured person or a third party commissioned by him has taken over for use, processing, safekeeping or transport or for other reasons (such as on commission, for exhibition purposes) or which he has rented, leased or rented;
- Damage caused to property as a result of the performance or omission of an activity by an insured person on or with them (such as processing, repair, loading or unloading of a vehicle). Activities in the above sense also include project planning and management, issuing instructions and orders, supervision and control and similar work. If an activity in the aforementioned sense only extends to parts of immovable property, the exclusion only refers to claims for damage to these parts themselves as well as to adjacent parts lying in the immediate area of activity. However, in the case of additions, alterations, repairs and improvements, the existing structure shall always be deemed to be the object of the activity in its entirety if it is underpinned or driven under or if work is carried out on its supporting or load-bearing elements (such as foundations, girders, retaining walls) which affect their supporting or load-bearing capacity. Claims arising from damage to neighbouring structures that are underpinned or driven under are, however, insured subject to sentence 1 of this paragraph. The insured is obliged to record a status report of the neighbouring structures before the start of construction;

Period of validity of the owner's liability insurance

- S1 Loss occurrence principle**
The insurance covers losses that occur during the policy period and are reported to the company no later than 60 months after the end of the policy.
- S2 Time of occurrence of damage**
The time of occurrence of damage is the time when the damage is first ascertained. In case of doubt, personal injury shall be deemed to have occurred at the time when the injured party consults a doctor for the first time because of symptoms of the health impairment in question, even if the causal connection only becomes apparent later. The time of occurrence of damage prevention costs is deemed to be the time when it is first established that damage is imminent.
- S3 Time of occurrence of loss in the case of series losses**
All losses in a series are deemed to have occurred at the time when the first loss occurred in accordance with S2 above. If the first loss in a series occurs before the start of the contract, all claims from the same series are not insured.

- A81** from damage to the insured building or property and the associated plant and equipment (subject to A65.8, A65.9, A65.10 under application of A79);
- A82** from damage to property due to gradual effects such as weather, temperature, humidity, sponge and fungus formation, dust, smoke, soot, gases, vapours or vibrations as well as wear and tear damage (for example to floors, walls and ceilings);
- A83** Loss prevention costs
- a) for loss prevention measures consisting of an activity that is part of the proper performance of the contract, such as remedying defects and damage to manufactured or delivered items or work performed;
 - b) for costs of remedying a hazardous condition;
 - c) for expenses for the detection of leaks, malfunctions and causes of damage, the emptying and refilling of installations, containers and pipes as well as costs for repairs and modifications thereto (such as remediation costs);
 - d) for costs for loss prevention measures taken due to snowfall or ice formation;
- A84** for costs and compensation of a punitive or quasi-punitive nature (such as fines, punitive and exemplary damages);
- A85** in connection with liability arising from the operation of airfields and from air shows;
- A86** in connection with the liability of employees who are employed by a third party on the basis of a contract of employment concluded with the policyholder (work rent or service rent) for damage to the property of this third party;
- A87** from the stock and/or operation of cableways of any kind for the transport of persons (company employees or third parties) and of ski lifts;
- A88** from pure pecuniary losses, i.e. losses measurable in money that are not attributable to an insured personal injury or insured property damage caused to the injured party (subject to A65.2, A65.3 and A65.6);
- A89** from damage as a result of warlike events, violations of neutrality, revolution, rebellion, insurrection, civil unrest and the measures taken against them, unless the person entitled to claim credibly demonstrates that the damage has no connection with these events;
- A90** from damage as a result of terrorism and the measures taken against it, unless the beneficiary credibly demonstrates that the damage is unrelated to these events;
- A91** from the impairment (such as modification, deletion or rendering unusable) of software or computer-processable data, unless it is the consequence of an insured loss to data carriers;
- A92** from damage attributable to the fact that, in the production, processing, further development or delivery of items, their use or effect with regard to the specific intended use has not been sufficiently tested in accordance with the recognised rules of technology or science or in any other way.

Additionally for the builder's liability

- a) from damage relating to the construction project itself or the associated property;
- b) from damage due to a reduction in the yield or drying up of springs;
- c) in connection with contaminated sites (such as contaminated excavation);
- d) due to immissions of any kind (such as noise, vibrations, dust, dirt, odours, impediments to access, loss of income). This also applies in particular to unavoidable impairments of neighbouring parcels in the case of lawful construction activity in accordance with Art. 679a of the Swiss Civil Code;
- e) from damage that is unavoidable from experience due to the chosen construction method (such as settlement and/or crack damage resulting from the execution of normal construction measures such as embanked building pits, nail walls, anchor work);
- f) against the builder of structures
 - which are attached to structures of third parties. This does not apply to pure conversions without significant intervention in the structural design and without earthworks;
 - built on slopes with a gradient of more than 50% or on lakeshores;
 - which have an excavation depth of more than 7 metres (measured vertically at the location of the deepest cut);
 - which require special construction measures. Special construction measures include all types of pile driving and vibration work, all types of groundwater lowering, diaphragm or sheet pile walls, all types of pile foundations, underpinning/undercarrying (with the exception of anchor work), penetration, pyrotechnic blasting, rock removal by means of a mining hammer;
 - which have a settlement-sensitive and non-stable subsoil (cohesive and organic soils).

Additionally for legal protection in criminal, supervisory and administrative proceedings

- for costs and compensation of a punitive or quasi-punitive nature (such as fines, punitive and exemplary damages).

Building legal protection insurance

The insurance covers	Where	Waiting Period	Period of coverage (basic event)	Building legal protection insurance	
Do you want to know what you are covered for? The coverage and sums insured of the insurance you required are listed in your policy. The explanation of terms must be used additionally to determine the insurance coverage.	Switzerland and Principality of Liechtenstein		The event that triggered the legal case is authoritative, namely:	In the case of legal consultation: T1 Legal consultation provided by the insurer related to the insured property; T2 Payment of lawyers' fees for legal consulting.	In the case of legal disputes: T3 Recognition of the legal interests by the insurer; T4 Payment of: a) lawyers' fees; b) expert witnesses' fees; c) charged to the procedural and court costs payable by the insured party; d) compensation to be paid to the other party for court costs.
A93 Legal disputes related to the insured property					
A93.1 Consulting in all legal fields		■	None	Sum insured CHF 500	
A93.2 Non-contractual legal disputes					
a) Claims for non-contractual compensation against the party responsible or against their liability insurer		■	None	Time that the loss or damage was caused	Sum insured CHF 250'000
b) Civil-law disputes with directly adjacent neighbours related to pollution and border disputes		■	3 months	Time of the event triggering the dispute	Sum insured CHF 50'000
c) Civil-law disputes related to property, restriction of rights in rem, or possession		■	3 months	Time of the event triggering the dispute	Sum insured CHF 50'000
d) Public construction and planning law in relation to the insured property or with directly adjacent land or properties		■	3 months	Time of application for building permission or first announcement	Sum insured CHF 5'000
A93.3 Legal disputes related to contract law					
a) Legal disputes with an insurance company		■	3 months	Time of the event triggering the insurance claim, otherwise the time of the notification triggering the dispute	Sum insured CHF 250'000
b) Legal disputes from rental agreement (as lessor)		■	3 months	Time of the event triggering the dispute	Sum insured CHF 50'000
c) Legal disputes from order/service contract		■	3 months	Time of the event triggering the dispute	Sum insured CHF 50'000
					In connection with a building project requiring approval, the sum insured is available once in total.

The insurance does not cover	
A94 Coverage of fines; compensation; costs that a liable third party is required to cover; costs related to public certification and registration; Assumption of costs for official approvals, permits and inspections; A95 Legal disputes that occurred before conclusion of the insurance contract or within the waiting period; A96 Legal disputes, that among persons insured in the same contract or against Coop Rechtsschutz AG and its governing bodies; A97 Claims in connection with the intentional commission of a criminal offence as well as in the case of legal disputes caused intentionally; A98 Claims in connection with warlike events or civil unrest; A99 Claims against lawyers, mediators, assessors or experts currently or previously working on a legal protection claim on behalf of an insured person covered by this policy.	In the case of legal consultation: T5 Representation of the insured party before courts or in negotiations. In the case of legal disputes: T6 Fending off compensation claims; T7 Assertion of purely financial losses (without the related bodily injury or property damage) in connection with the assertion of non-contractual compensation against the party responsible or their liability insurer; T8 Cases related exclusively to the collection of receivables and in cases related to assigned receivables.

Definition of terms

Contractual disputes often arise because both contracting parties use one and the same term, but make different associations with term. We will therefore explain the most important expressions here in alphabetical order.

Advance payment	Advance payment for the benefits and costs to be provided by the liability insurer of a legally or contractually liable third party, but no more than the benefits insured by this contract. The claimant must assign his claims for compensation to Helvetia in the amount of the advance paid. If the benefits paid by the liability insurer do not reach the benefits provided for by this insurance, the difference in benefits shall be paid.
Aesthetic flaws	A state that is unappealing to the eye, but does not impair the function of the structure or component, such as honeycombing in exposed concrete, colour differences and/or structural changes in materials and surfaces, scratches on glazing, bathtubs and shower trays, washbasins, kitchen fronts, covers, flooring, façades, and soiling caused by cement water, etc.
Building	A building in insurance terminology refers to any non-movable product of construction work, including all of its components, that is roofed, provides usable space, and has been established as a permanent facility. The term “building” can also refer to facilities that – without being part of the building itself – would normally be associated with it, are owned by the building’s owner, and are attached or modified in such a way that they could not be removed without significantly reducing their value or significantly damaging the building. “Buildings” also include the facilities that are locally considered to be a standard feature of the building and are owned by the building owner, even if these could be removed without significantly reducing the value or significantly damaging the building. In the case of buildings and facilities consisting of both structural and operational installations, the term “building” refers to the parts of the facilities that are exclusively or predominantly structural in nature. This includes facilities and equipment related to building services and infrastructure, as well as water pipelines, air ducts and energy-supply pipelines and cabling from the point of supply from the building inlet or the generator in the building to the consumer (including primary and secondary distributors). The sum insured by way of the buildings insurance does not include pit excavations, water drainage, levelling, backfilling and environmental work, work aimed at improving the construction ground, and secondary construction costs. In cantons with cantonal buildings insurance, the relevant cantonal provisions apply regarding categorisation.
Building components	Components of buildings (or buildings) excluded from cantonal buildings insurance.
Building surroundings	a) Structural facilities outside of the insured building that are located on the associated land, including letter boxes, fountains, chimneys, swimming pools including covers, garden sheds, pergolas, fireplaces, gardens, playgrounds, garden tables attached to the ground, sculptures, paved and gravel paths, courtyards, bicycle storage facilities; b) Garden facilities in the insured building, including lawns, shrubberies, flowers, bushes, trees, fences, hedges, ponds and their content, watering and illumination equipment; c) Structurally-related infrastructure on the associated land, including parking spaces, driveways and walkways to and from the property, bridges, platforms, ramps, footpaths, tunnels, turntables, barriers, staircases, railings, supporting walls, boundary fencing, tracks (including their underlying constructions), supply and disposal lines and pipes as well as ducts and collecting basins; d) Special foundations on the associated land, i.e. bored, driven, concrete, wood and special piles, sheet walls, Berlin-type walls, slurry walls, pile walls, reinforcements, groundwater impoundments, anchoring and similar.
Civil unrest	Violence committed against persons or property in the course of riots or turmoil.
Condition difference cover	Insofar as the scope of cover of the present contract goes further than that of another insurance contract, the insurance cover granted under the present contract shall apply. The deductible agreed in the policy shall be applied.
Construction budget	Each individual service is assigned to a certain number in line with a standard which applies throughout Switzerland in order to structure the phases of the planning and construction process.

Construction services	Services for buildings of any kind during the construction period i.e. a) after unloading, the items on the building site required for construction work; b) until all construction services have been approved or deemed to be approved by way of the assumption for further use (e.g. residing); in the case of residential or construction units to be implemented in a segmented fashion (single family houses/multi-family dwellings/freehold apartments), at the time when all construction services for the unit in question have been approved or are deemed to be approved. The construction amount for construction services, including all associated construction materials and parts, is equivalent to the total of items 1 to 4 on the construction budget (including fees and VAT) and encompasses: 1 Preparatory work; 2 Buildings; 3 Operating facilities; 4 Surroundings. The term construction services does not include costs for advance studies and tender procedures, property and allotment costs, costs of financing or fees.
Contaminated sites	Known or unknown accumulation of pollutants in the soil or water existing prior to the insured event.
Co-ownership	A form of ownership where the building or land belongs to several owners jointly. The collective property is broken down into parts (shares). Each owner owns a share that they can exercise ownership rights over. They may sell or encumber their share. The owner’s creditors may pledge the share.
Costs due to regulatory reconstruction restrictions	Costs that increase the effective property damage due to regulatory reconstruction restrictions in force at the time of the claim.
Costs for locating, exposing and repairing pipes	Costs for locating, exposing and repairing leaks and walling up or covering repaired pipes owned by the policyholder and whose purpose is to transport liquids or gas, in the insured buildings, on the policyholder’s appurtenant property and own supply lines, starting from the main communal line, as well as owned line systems from the consumer to the public sewage ducts.
Costs for replacing locks	Costs for changing or replacing locks on insured buildings and replacing associated keys and other locking systems (e.g. badge systems).
Costs for risk-reducing measures	Structural and/or technical measures enhancing the coverage value by way of the replacement or repair of the damaged item.
Digital data and software	a) Digital data within the meaning of this insurance are electronically/magnetically stored information (e.g. data on databases, text files, graphic files, personal data); b) Software within the meaning of this insurance are applications, codes and programmes with which digital data are processed.
Earthworks	Excavation work with a depth of more than 1 metre, new foundations and cellar excavations. Earthworks do not include work on utility lines (pipe trenches) up to an excavation depth of more than 2.5 metres in connection with building construction work.
Environmental damage	The sustained impairment of the natural state of air, water (including groundwater), soil, flora or fauna through pollution, provided that this pollution is able to have a damaging or other effects on human health, material assets or ecosystems or has already done so. Environmental damage is also deemed to be any matter referred to as such by the legislative.
Equipment and materials	Owned and unregistered working machinery (e.g. lawnmowers, snow removal machines), garden tools, waste and Plant waste containers and similar used for the maintenance of the building and associated land. Own electric charging stations and their management system whose purpose is to charge electrically powered vehicles, which are permanently connected to the insured building and are not included in the building insurance sum. Materials (such as fuels, gritting salt) and construction materials that are owned by the building owner and are not yet an integral part of the insured building.
Freehold ownership	A special form of joint ownership. Here, each owner is entitled to the exclusive use and management of a precisely defined part of the building, usually a freehold apartment (see also joint ownership).

Follow-up costs	a) Necessary follow-up costs Necessary follow-up costs that the policyholder incurs directly and in direct relation to the damage caused to objects insured in this contract. The term follow-up costs as defined above does not include: ■ Costs for locating, exposing and repairing; ■ Cost of damage verification; ■ Costs for obligation to co-operate such as travel expenses; ■ Costs for real estate management; ■ Costs related to bodily injury; ■ Loss of earnings or additional costs involved in maintaining operations; ■ Costs that would have been incurred without the property damage, regardless of whether and when this amount would have been spent without the damage; ■ Recovery costs for data, where such data has been lost as a result of programming, data entry, insertion or labelling errors, deletion or disposal, or as a result of programs or processes that result in the destruction or modification of programs or data (e.g. viruses); ■ Costs for services to be performed by public services (e.g. fire brigade, police) due to statutory provisions; ■ Environmental damage, except decontamination costs. The decontamination costs covered by the insurance include examination of soil (including flora and fauna) and extinguishing water on owned or leased property, the transport of contaminated soil or extinguishing water (if necessary) to the nearest suitable landfill for storage or destruction, and restoration of the owned or leased property to its condition prior to the claim. b) Standing costs The standing costs of the building incurred despite the unusability of the insured premises (e.g. mortgage interest, heating and other ancillary costs, insurance premiums). c) Artistic and historic values The insurance covers the costs for the most faithful restoration or reconstruction possible of parts of the building that are of artistic or historic value. d) Subsequent increase Increase in cost of construction occurring between the date of damage and that of reconstruction. The increase is calculated in accordance with the applicable construction cost index.
Glazing of buildings and building surroundings as well as sanitary facilities	Glazing, glass and sanitary facilities of: a) buildings and parts of buildings; b) building surroundings; c) equipment and materials. Glass-like materials such as glass-ceramic, stone, Plexiglas and other plastics used in place of glass are also considered to be glass. Damage to painting, text elements, film and paint coatings, etched and sand-blasted glass.
Individual items protected by the right to individual assets	Assets and rights that are marketable and to which ownership and possession can be acquired.
Insured Persons	The cover includes the statutory liability a) of the policyholder as the owner of the buildings, land or facilities listed in the policy; b) of the employees and auxiliary staff of the policyholder on the basis of their work in connection with the insured buildings, land, facilities and installations; c) of the individual co-owner or condominium owner and the persons living in the same building as him/her, but only for damages in accordance with A65.8 and A65.10; d) of the land owner, in cases where the policyholder is the owner of the building only and not of the land (ground lease); e) of the land owner, in cases where the policyholder is the constructor of the building, but not the property owner (due to right of passage or right of way) in connection with an insured event in accordance with A65.4. If the policyholder is mentioned in the policy or in the GTC, this always means the persons mentioned in section a, while "the insured" or "the insured persons" refers to all persons mentioned in sections a–e. In further clarification of section b, the statutory liability of the insured from the execution of work by contracted independent businesses and professionals (such as subcontractors and subplanners) is also insured. However, the insurance does not cover the personal liability of the third parties engaged. A right of recourse remains reserved. If the policyholder is a partnership (simple partnership, general partnership or limited partnership), or a community of property (e.g. community of heirs), or if the insurance was taken out on behalf of a third party, the partners, the members of the community of property or the persons in whose name the insurance was issued are treated in the same way as the policyholder with regard to all rights and obligations.
Insurer Building legal protection	The insurer for the building legal protection insurance is Coop Rechtsschutz AG, Entfelderstrasse 2, CH-5001 Aarau (Tel. +41 62 836 00 57). Notifications can be sent to this address.
Items of monetary value	Own and entrusted monetary assets such as cash, digital monetary units with cryptographic keys such as Bitcoin, customer and credit cards, mobile phone prepaid cards, cheques, credit card receipts, car vignettes, impersonal tickets, season tickets, vouchers and lottery tickets, securities, gold, silver and platinum metals (as stocks, bars or merchandise), coins and medals, unmounted precious stones and pearls.

Joint ownership	A form of ownership where the building or land belongs to several owners jointly. As a result, the owners may only utilise the property jointly as a whole, file legal complaints jointly in relation to the property as a whole, or have legal complaints filed against them jointly in relation to the property as a whole.
Liability	The legal requirement to assume responsibility for damage suffered by a third party.
Loss/damage prevention costs	The costs incurred by the policyholder in taking reasonable measures to avert an immediate imminent insured loss as a result of an unforeseen event.
Loss of rental income, loss of earnings, additional costs	a) Rental income lost to the policyholder insured party due to the unusability of the rented buildings or of premises in buildings as a result of insured property damage; b) Loss of revenue, i.e. the income generated by the building itself (e.g. energy/electricity from photovoltaic systems); c) Additional costs required for the maintenance of operations within a presumed scope during the period of disruption. Additional costs are deemed to be: ■ Reducing loss/damage prevention costs that enable the potential loss/damage to be reduced during the liability period; ■ Special expenses related to measures whose effect on reducing potential loss/damage during the liability period cannot be adequately proven or whose ability to reduce the potential loss/damage does not take effect until after the liability period ends.
Natural forces	Buildings (A1) and equipment and materials (A7) are subject to compulsory and natural forces insurance, which is governed by the Private Insurer Supervision Ordinance (Aufsichtsverordnung, AVO).
Period of coverage (basic event)	Life circumstances that gave rise to a legal dispute and/or that form the basis of a legally contested measure.
Punitive or exemplary damages	Punitive damages or compensation of a punitive nature which may amount to several times as much as compensation. In this context, the way in which the damage was brought about is the determining factor (malice or fraudulent or deliberate intent are particularly aggravating circumstances). To ensure that the "penalty" is appropriate, the amount of the punitive damages awarded is geared to the financial position of the party at fault.
Separate property entitlement	The right of a freehold property owner to the exclusive use of a certain part of a building or land.
Sum difference cover	Insofar as the sum insured under the present contract is higher than that under another insurance contract covering the damage, only that part of the claim amount will be reimbursed which exceeds the sum insured under the other insurance contract, with the maximum indemnification simultaneously being reduced by said sum insured. No deductible will be applied.
Supplementary insurance coverage for cantonal buildings insurance	Differences in the scope of benefits under the terms and conditions and in the amount of entitlement to items, costs and income compulsorily insured with cantonal buildings insurers.
Systems and equipment related to building services and infrastructure	Installations and equipment of the building technology and infrastructure which fall within the building insurance sum and are firmly connected to the insured building or are located on the associated premises and whose purpose it is: a) serve for heating, ventilation, shading or power supply and/or supply energy to external networks, combined heat and power unit, solar thermal, fuel cell, heat pump systems, heating systems, photovoltaic, wind systems, battery storage; b) serve internal movement within the building, such as lifts, escalators, etc; c) to serve communication, such as two-way and intercom systems, telephone systems, radio systems; d) regulate access to and monitoring of the building or its infrastructure, such as alarm systems (burglary, fire), access control systems; e) perform other tasks for the building or for the building infrastructure, such as installations and appliances of the basic equipment (such as cooker, dishwasher, lighting); f) ensure connectivity through smart home devices; g) to charge electrically powered vehicles, namely electric charging stations and their management system. All components of the system or device that are required for use (incl. operating system and firmware that are an integral part of insured objects) are deemed to be a unit.
Terrorism	Terrorism is any use or threat of violence with the purpose of achieving a political, religious, ethnic, ideological or similar objective. The use or threat of violence is capable of spreading fear or terror among the population or certain population groups or influencing a government or government institution. Terrorism does not include civil unrest.
Underinsurance	If the replacement value of the insured object at the time of the loss event is above the sum insured, the object is underinsured. In such cases, the compensation is reduced at a rate commensurate to the difference between the replacement value and the sum insured.
Waiting period	If a waiting period is introduced in an insured area, legal disputes occurring within this period after the effective date of the insurance contract are not covered. This concerns legal disputes that arise during these first three months after the effective date of the insurance contract.
